

Privacy Policy

QuickShrink — Video Compressor for macOS

Effective Date: April 12, 2026

1. Introduction

Welcome to QuickShrink. We are committed to protecting your privacy. This Privacy Policy explains what information we collect (and what we do not), how we operate, and your rights as a user.

QuickShrink is a macOS desktop application designed to compress video files locally on your device. We built QuickShrink with a privacy-first approach: your video files never leave your Mac.

2. Information We Do Not Collect

QuickShrink does not collect, transmit, store, or share any of the following:

- Your video files or their contents
- File names, file sizes, or metadata of your videos
- Personal information such as your name, email address, or Apple ID
- Usage statistics or analytics data
- Device identifiers or IP addresses
- Location data

All video compression is performed entirely on your local device using Apple's native AVFoundation framework. No data is ever sent to our servers or any third-party servers.

3. Local Processing Only

QuickShrink operates exclusively on your Mac. When you compress a video:

- The original video file is read directly from your chosen location on your device
- Compression is performed locally using macOS native frameworks
- The compressed output is saved to a folder you explicitly select
- No internet connection is required or used at any point during compression

4. App Store and Apple

QuickShrink is distributed through the Mac App Store. When you purchase or download QuickShrink, Apple may collect information as part of their standard App Store operations,

including purchase records and crash reports. This data is governed by Apple's Privacy Policy available at apple.com/legal/privacy.

We may receive anonymized, aggregated crash reports from Apple to help us identify and fix bugs. These reports do not contain your personal data or any video content.

5. Permissions Requested

QuickShrink requests the following macOS permissions, solely to provide its core functionality:

- User Selected File Access: To read video files you explicitly choose to compress
- Downloads Folder Access: To save compressed videos to your Downloads folder
- Movies Folder Access: To access videos stored in your Movies folder

These permissions are only active when you initiate a compression task. QuickShrink does not access any files beyond what you explicitly select.

6. Children's Privacy

QuickShrink is not directed at children under the age of 13. Since QuickShrink collects no personal data from any user, there is no specific privacy risk to children from using this app.

7. Changes to This Privacy Policy

We may update this Privacy Policy from time to time. Any changes will be reflected with an updated effective date at the top of this document. Continued use of QuickShrink after changes constitutes acceptance of the updated policy.
