Stroke Med Reminder is designed with your privacy as a top priority. All health data you enter is stored exclusively on your device and is never transmitted to our servers. We do not sell, share, or monetize your personal information.

1. Information We Collect

1.1 Information You Provide Directly

- **Profile information** — your name, doctor's name, doctor's phone number, and emergency contact details.
- **Medication data** — medication names, dosages, schedules, and stock counts you enter manually.
- **Health logs** — blood pressure readings, heart rate, mood, energy levels, and symptom notes you record.
- **Recovery routines** — physiotherapy, exercise, and therapy session records.

1.2 Information from Apple Health (Optional)

If you grant permission, the app reads the following data types from Apple HealthKit: Blood Pressure (systolic and diastolic), Heart Rate, and Step Count. This data is read-only by default and optionally written back when you log a new blood pressure reading. You may revoke HealthKit access at any time via Settings → Privacy & Security → Health.

1.3 Information We Do NOT Collect

- We do not collect analytics, usage statistics, or crash reports.
- We do not access your camera, microphone, contacts, or location.
- We do not create user accounts or collect email addresses.
- We do not use cookies or third-party tracking SDKs.
- We do not collect advertising identifiers (IDFA).

2. How We Use Your Information

All information collected by Stroke Med Reminder is used solely to provide app functionality:

- Display your daily medication schedule and send local reminder notifications.
- Calculate and display your medication adherence score and recovery streaks.
- Show blood pressure trends and health log history within the app.
- Generate a PDF health report that you can share with your doctor.
- Provide personalized onboarding based on your condition and routine preferences.

3. Data Storage & Security

All data is stored locally on your iPhone using Apple's UserDefaults and is encrypted by iOS device encryption. We do not operate servers, databases, or cloud infrastructure that stores your data. Your data exists only on your device and any iCloud backups you configure through iOS Settings.

■ ■ If you delete the app, all locally stored data will be permanently erased. We recommend exporting a PDF report before uninstalling if you wish to retain your records.

4. Apple HealthKit

Stroke Med Reminder integrates with Apple HealthKit strictly in accordance with Apple's HealthKit guidelines. Specifically:

- HealthKit data is used only to display health metrics within the app and generate your health report.
- HealthKit data is never used for advertising, user profiling, or shared with third parties.
- HealthKit data is never sold or transferred to data brokers.
- You can disconnect Apple Health integration at any time from iOS Settings.

5. Local Notifications

The app uses Apple's local notification system to send medication reminders. These notifications are scheduled and delivered entirely on your device — no data is sent to external servers. You may manage notification permissions via Settings → Notifications → Stroke Med Reminder.

6. Children's Privacy

Stroke Med Reminder is not directed at children under the age of 13. We do not knowingly collect personal information from children under 13. If you believe a child has provided us with personal information, please contact us at profitfirstllc@gmail.com and we will take appropriate action.

7. Third-Party Services

The app does not integrate with third-party analytics services, advertising networks, or social media platforms. The only external framework used is Apple HealthKit, which is governed by Apple's own privacy policy.

8. Your Rights

You have the following rights regarding your data:

- **Access** — all your data is visible within the app at all times.
- **Export** — export your data as a PDF report via Profile → Export to PDF.
- **Deletion** — delete individual records within the app, or delete all data by uninstalling the app.
- **Portability** — your data exists in standard Apple system formats on your device.
- **HealthKit revocation** — revoke HealthKit permissions via iOS Settings at any time.

9. Changes to This Policy

We may update this Privacy Policy from time to time. Material changes will be communicated through an app update or in-app notice. The effective date at the top of this document will reflect the date of the latest revision. Continued use of the app after any changes constitutes acceptance of the updated policy.

10. Contact Us

If you have any questions, concerns, or requests regarding this Privacy Policy, please contact us:
